ABOUT ME

Information Systems Engineering Student (UTN), passionate about solving logical and algorithmic problems. With the ability to research, adapt quickly to changing environments, and collaborate effectively in a team. I am looking for an internship to take my first professional steps and add value to technical projects. Currently, I am focusing on backend application development, delving into Java with Spring framework, creating REST APIs, and learning microservices-based architecture. Additionally, I have a strong interest in requirements gathering, system design, and process optimization, always seeking to build efficient and well-structured solutions from their conception.

EDUCATION

Information Systems Engineering (2023 - Present)

Universidad Tecnológica Nacional

Professional and Personal Computer Technician (2015 - 2022)

IPET N°58 General Mosconi

PROJECTS

Mechanic Workshop Management System | Java, Swing, JPA, Hibernate
[GitHub]

- Desktop application designed for administration and control of service orders, clients, and vehicles. Implementation under OOP principles and an interactive graphical interface with Java Swing.
- Business logic modeling, data validation, and persistence management through JPA / Hibernate connecting to a relational database.

FullTech e-Commerce | HTML, CSS, JavaScript
[GitHub]

- Responsive frontend development focused on user interaction and an adaptable design for different resolutions. Dynamic DOM manipulation and asynchronous event management using native JavaScript.

SKILLS

- **Programming Languages:** Java, JavaScript, Python
- **Databases:** MySQL, SQL Server, H2
- **Frameworks/Technologies:** Spring Boot, Spring Data JPA, Hibernate, REST APIs, Spring Security, Docker.

LANGUAGES

- **English:** Intermediate
- **Spanish:** Native
